DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 12/11/2006 have been fully considered but they are not persuasive. Applicant argues that Alanara fails to disclose receiving first and second paging frames from a digital control channel transmitted by first and second base stations, respectively. The examiner, however, disagrees.

Alanar does disclose a mobile station having methods for performing neighbor channel measurements from analog control channels. Alanara also supports that the mobile station can receive a page frame from a Digital control channel (DCCH) (abstract). Alanara further supports a mobile station receiving information from the use of both analog and digital control channels (col. 1, lines 20-49). Alanara also teaches that the air interface standard includes ACC and DCCH (col. 3, lines 62-65).

Therefore, the examiner still believes that Alanara reads on the invention as presently claimed. The rejection to the claims is set forth below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2617

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 4-10, 12-17, 21-29 and 31-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Alanara, U.S. Patent No. 6,119,002.

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1, 2, 4-10, 12-17, 21-29 and 31-38, Alanara discloses a method/system/mobile station of evaluating a base station without missing a digital control channel (DCCH) paging frame (col. 2, lines 48-65, col. 3, lines 62-67), comprising receiving a first paging frame from digital control channel by a first base station (abstract and col. 1, lines 20-49); initiating a timing sequence after receiving said first paging frame; prior to completion of the initiated timing sequence, scanning for system parameters from digital control channel of at least one second base station; and receiving a second paging frame from the digital control channel transmitted by said first base station (col. 5, lines 14-35, col. 6, lines 1-25).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2617

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
